

NURSERY JAWS® JR

The Nursery Jaws® JR is built to the exacting standards of its big brothers, but with the smaller landscaper or nursery in mind. It is the perfect match for a small to mid-size loader and makes a one-person operation out of your landscaping jobs. Like all the Nursery Jaws®, the Nursery Jaws® JR tackles all your material handling needs. B&B, containers, boxes or boulders are all easily handled with a Nursery Jaws® JR.

- Handles up to 36" B&B,
- 20"-24" boxes or containers
- Smaller rocks and boulders.
- 1500# rated capacity
- Light weight for smaller loaders
- Compact for use in tight areas.
- Narrow fork spacing

Hydraulics All components rated for 3000psi 2-5 GPM adequate for speed of operation.

Largest Rootball capacity 40"

"Just a note to let you know how pleased we are with the Nursery Jaws® JR we purchased from you recently. For years we loaded small root balls by hand or with a skid loader bucket. Now we can load and haul root balls much quicker and with less labor than before. It definitely makes us money. As a matter of fact, we just purchased a second unit. Thanks again!"
