

# NEXT GENERATION™ by DPM

The Next Generation Nursery Jaws® are the newest addition to the Nursery Jaws® family of material handling attachments. Next Generation Nursery Jaws® has impressive capacity with heavy duty construction for long life. The Next Generation Nursery Jaws® incorporates the versatility of the Nursery Jaws® II's method of handling materials but with a greater capacity, greater range of motion, and with virtually no maintenance! From large to small, now you can do it all!

Next Generation Nursery Jaws® handle up to 65" B&B, 36" boxes (up to 48" with the expanded model) containers, grow-bags, rocks & boulders up to 2 1/2 tons

Two functions to adjust parallel width of forks, with a wider range of adjustment than the Nursery Jaws® II. The ability to handle materials either by using the pivot fork or the parallel movement of the pivot arm makes it extremely USER FRIENDLY!

"The steadily increasing quantity of Nursery Jaws® in our production holding area is the best example of the pivotal role they play in efficiently moving and loading thousands and thousands of heavy, balled and burlapped trees.

We've tried two other varieties and our loaders like Nursery Jaws® the best! With minimal, if any, design/breakdown issues, we find them extremely reliable and absolutely perfect for our size, weight and safety needs. "

- Kathy Sharp, General Manager  
Kendall Hill Nursery  
Newark, IL

<b>Fork Length</b>	80"
<b>Fork angle</b>	Fixed @ 22 degrees
<b>Fork Face Material</b>	Tread Plate
