

How to Choose Which Model of Nursery Jaws Is Best For You

By asking the right questions, you can easily determine which Nursery Jaws best fit your operation. For example, a small landscaper with a 1200lb. lift capacity loader does not need a Nursery Jaws 2. Conversely, a large wholesaler with a 3000lb. capacity loader should not have a Nursery Jaws Jr. There are, of course, exceptions to every rule, but, here are a few guidelines to follow.

HEAVY DUTY MINI JAWS HYBRID STYLE

What materials will the Mini handle?

Up to 36" B&B, plastic containers, & small rocks, depending on loader.

Loader requirements? Compact Mini Skid steers only 1500lbs capacity.

Characteristics of the Heavy Duty Mini Jaws? Light weight (300lbs) 36" -48" forks, very durable construction for newer high capacity or tracked mini loaders.

NURSERY JAWS JR.

What materials will the NJ Jr. handle? Up to 36" B&B; 20" -24" boxes; plastic containers; small rocks & boulders.

Loader requirements? 1500lbs. rated capacity and less.

Characteristics of the Nursery Jaws Jr.? Light weight (400-450lbs.) for smaller loaders; compact for use in tight spaces; (50" or 66" forks), and narrow fork spacing (parallel at 18").

NURSERY JAWS Hybrid

What materials will the NJ Hybrid handle? Up to 60" B&B; up to 36" boxes, plastic containers, grow-bags, boulders.

Loader requirements? 1500lbs - 3000lbs rated lift capacity.

Characteristics of the Nursery Jaws Hybrid? Load, move and plant B&B, boxed and container trees, boulders. Manually adjustable pivot point allows for wider and narrower parallel spacing than the Nursery Jaws 2.

NURSERY JAWS 1 New Style

What materials will the NJ 1 handle? Up to 44" B&B; up to 24" boxes, plastic containers, grow-bags, boulders.

Loader requirements? 1500lbs - 3000lbs rated lift capacity.

Characteristics of the Nursery Jaws 1 ? Load, move and plant B&B, boxed and container trees, boulders.

NURSERY JAWS 2

What materials will the NJ2 handle? Up to 50" B&B; 32" boxes (up to 36" with expanded model), plastic containers; grow-bags; rocks & boulders.

Loader requirements? 1500lbs - 3000lbs rated lift capacity.

Characteristics of the Nursery Jaws 2? It has 2 functions to adjust parallel width of the forks. This allows easier handling of small, large and multiple B & B, boxes and container trees; same side loading and unloading (66" or 72" forks), planting, placing large boulders, and building boulder walls.

Next Generation Nursery Jaws

What materials will the NG NJ handle? Up to 65" B&B, up to 36" boxes (up to 48" with the expanded model), plastic containers; grow-bags; rocks & boulders up to 2 1/2 tons.

Loader requirements? 2000lbs - 4500lbs rated lift capacity.

Characteristics of the Next Generation Nursery Jaws? It has 2 functions to adjust parallel width of forks, but has a wider range of adjustment than the NJ2. It can handle materials either by using the pivot fork or parallel movement of the pivot arm. Same principle as NJ2 with increased capability and durability.

PALLET PAWS

What materials will the Pallet Paws handle? Up to 60" B&B, up to 48" boxes, up to 95 gallon plastic Containers, Grow bags up to 65 gallons and boulders up to 5000 lbs. Can even handle a pallet of retaining wall blocks. Can be used for other industries as well.

Loader requirements? 2000lbs - 5000lbs rated lift capacity.

Characteristics of the Pallet Paws? The Pallet Paws is a Pallet Fork/Nursery Jaws combination unit. Forks lay flat to be used as regular pallet forks, but they are hinged in the back and rotate to the perfect angle as you grasp any kind of product. Heavy-duty double cylinder action moves **both** forks inward or outward at the same time.
